Leblanc Illuminations Intellectual Property Certificate

I, the undersigned, hereby certify that LEBLANC ILLUMINATIONS, headquartered at 6 - 8 Rue Michael Faraday, 72027 Le Mans Cedex 2 (France) is the manufacturer and original designer of all lighting decorations and illuminated displays commercialized under the LEBLANC ILLUMINATIONS trademark and in particular, of the "Ginger House" installed in the city of Ceske Budejovice.

In LEBLANC ILLUMINATIONS, we design, develop, and manufacture all products in Le Mans, France, thanks to our undeniable know-how and our team composed of several experts. Our production processes quality management procedures, and organizational standards are certified under ISO 9001, demonstrating our commitment to consistent quality, reliability, and continuous improvement.

We are very sensitive to Intellectual Property and as the creator and right holder of our original and unique decorative concepts, we hold registered designs, as well as supporting documentation establishing our ownership and authorship.

This declaration is issued in the context of the installation of decorations in the city of Ceske Budejovice by our business partner, CITY ILLUMINATIONS. This new project has led to the circulation of misleading and inaccurate information about the origin and costs of the installed decors, and especially the "Ginger House" - calling into question the integrity of both CITY ILLUMINATIONS and the city of Ceske Budejovice.

As a recognized leader in our field, our creations are regularly imitated, and our work naturally attracts the interest of parties seeking to benefit from our proven excellence. These misleading claims actually originate from a product listed on Alibaba, which constitutes a clear counterfeit of our original decorations and uses our photographs identically without authorization. The listed prices are significantly lower than the actual production costs, reflecting the inferior quality and non-compliance of these products with safety standards.

The manufacturing of Christmas decorations is subject to strict quality and safety requirements, particularly when these installations are intended for public spaces. For this reason, it is essential to rely on recognized and certified industry partners who meet European standards, rather than on dubious online vendors that are well-known for disregarding safety regulations. Choosing reputable manufacturers ensures not only the durability and aesthetic value of the decorations, but also the safety of the public.

We hereby attest that the Ginger House, which has been installed in the city of Ceske Budejovice, is an original creation fully designed, engineered and manufactured by our company and is in no way comparable to the one listed on Alibaba.

We will take all the necessary measures to ensure that any infringing listings on Alibaba are promptly removed.

Mrs Alexandra PETIT
